DETAILED ACTION

- 1 This action is responsive to the amendment filed on 6/7/2004.
- 2 The objection of claims 1 and 16-29 is withdrawn because of the applicant's amendment.
- 3 The rejection of claims 1-29 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of copending Application No. 10/694,971, is now rendered moot because of the express abandonment of the Application No. 10/694,971.
- 4 Claims 1-29 are allowed.

STATEMENT OF REASONS FOR ALLOWANCE

- 3 The following is an examiner's statement of reasons for allowance:

Larsky et al. (US 5,472,456) teaches a method for dyeing hair comprising the steps of applying to the hair a dyeing solution comprising melanin dyes of natural colorants followed by generating an electric field within the hair so as to induce the flow and coupling of the dyeing agents to the hair by electrophoresis (see col. 2, lines 30-35). However, patentee differs from the instant claims in that Larsky et al. (US' 456), does not teach or disclose a system or method for dyeing hair comprising applying to the hair an oxidative dye precursor mixture containing at least one primary intermediate having a standard Redox potential less than 1 volt, and wherein the primary intermediate is electrochemically oxidized by an electrode system to produce the claimed reactive intermediates that generate the colors as required in the instant claims. Accordingly, the claimed subject matter as a whole would not have been obvious to one having ordinary skill in the art of hair dyeing processes.
